EDUCATION

INDERPRASTHA ENGINEERING COLLEGE

Bachelor of Technology

Bachelor's degree in Computer Science and Engineering(AIML)

Ghaziabad, UP

11/2021 - Present

EXPERIENCE

DHx Software

02/2024 - Present

(Software Development Intern)

- Developed plugins using PHP to extend and enhance system functionality.
- Worked with the eFront platform to integrate and customize features for learning management.

Plutonic Services

11/2024 - 02/2025

(Frontend Development Intern)

- Built and improved user-friendly interfaces for an Employee ERP system using React, Ant Design and Redux, resulting in better user experience.
- Worked with different teams to develop and add interactive UI features, ensuring the application was responsive and performed well on all devices.

Coperion

07/2024 - 10/2024

(Software Development Intern)

- Worked on building a document management system using ReactJS, ExpressJS, and Microsoft SQL Server, improving how documents are stored, accessed, and managed across the organisation.
- Created SQL queries to make data retrieval faster, improving the speed of data analysis and reporting.
- Collaborated with cross-functional teams to analyse data requirements, generate reports.

SKILLS

Technical Skills: C++, React.js, Node.js, Git, MongoDB, Express.js, HTML, CSS, JavaScript, PHP

PROJECTS

CusineConnect

- Built a recipe-sharing app with JWT and Cookies for user authentication.
- Developed REST APIs with Node.js and MongoDB for managing recipes and user data.
- Designed the front-end using React.js and Tailwind CSS for a modern look.
- Managed state with Context API for smooth application performance.
